Professional High School

SECOND QUARTER

ICT 9 Quiz #1: Applying Bootstrap Image and Table

NAME _____ SCORE _____

Creating a Web Page with Bootstrap

Materials & Tools:

Web Design Basics Book
Online Source for Images and information
Text Editor: Sublime Text

Objective:

Research 3 cryptocurrencies and showcase them by creating a webpage using HTML, Bootstrap, and CSS. Each cryptocurrency should have a logo, a brief description, and relevant details.

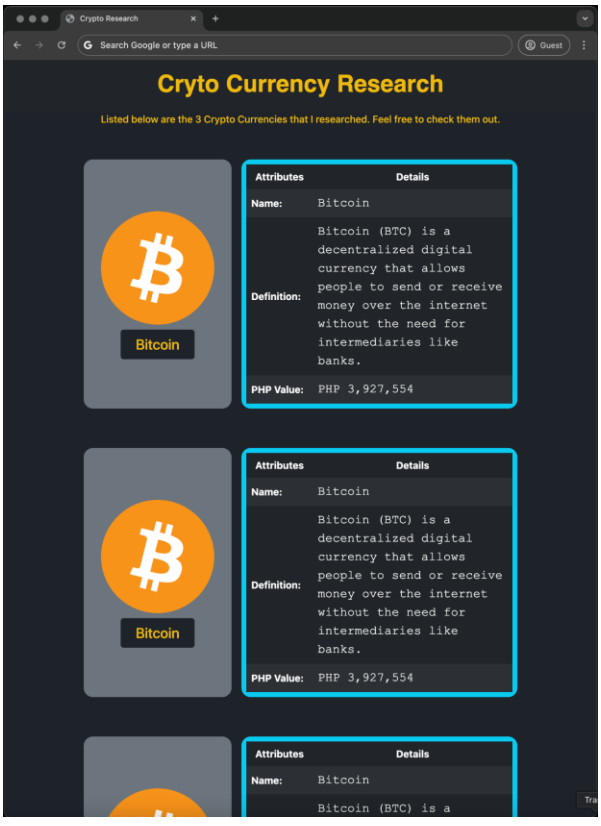
Instructions:

1. Plan your page: Decide on which cryptocurrencies you want to research.
   Ex: Bitcoin, Ethereum, Ripple.
2. The key elements of your web page should include the following:
   a. *HTML Structure.* Follow the syntax for basic HTML structure, including doctype, html, head (with title), and body.
   b. *Headings tags.* Create a proper heading for the page.
   c. *Paragraphs tags.* Insert information on the chosen characters.
   d. *CSS Span and DIV elements*. Organize web content.
   e. *CSS Texts, Colors, and Backgrounds.* Set and decorate texts with CSS properties
   f. *Bootstrap Table.* Apply bootstrap classes for tables
   g. *Bootstrap Images*. Style images with Bootstrap classes.
   h. *Bootstrap Responsive:* The layout adjusts correctly for different screen sizes.Test by resizing your screen.
   i. *Link tags.* Include hyperlinks for your online sources
3. Upload your site on GitHub.
4. Save your file with this filename format:
   Repository: Campus_ICT9Section_Q2Q1_LName_FName

HTML Filename: index.html

5. Submit your REPO and GitHub page link through the OB Digital Platform and add the appropriate caption.

SAMPLE OUTPUT (Different Screen Sizes)



CRITERIA	5	4	3	2	1
Execution of Instructions	All instructions are followed meticulously with exceptional attention to detail. The webpage showcases the favorite animated movie effectively, utilizing all required HTML and CSS elements with precision.	Most instructions are followed accurately with clear demonstration of understanding. The webpage showcases the favorite animated movie well, utilizing most of the required HTML and CSS elements appropriately.	Instructions are followed adequately with some minor deviations. The webpage showcases the favorite animated movie adequately, utilizing most of the required HTML and CSS elements correctly.	Instructions are followed adequately with some minor deviations. The webpage showcases the favorite animated movie adequately, utilizing most of the required HTML and CSS elements correctly.	Instructions not followed, leading to a webpage that does not effectively showcase the favorite animated movie. Many required HTML and CSS elements are missing or incorrectly implemented.
